

Within the standard programs of MindPro, this area typically displays a program syllabus or program outline that can be downloaded and printed by students. However, for custom programs, this area can be customized to satisfy the needs of a client company, or even different instructor led groups within the same company. **Virtually any type of text or graphics that can be made into a PDF can be posted here for all your students to see as they start their training.**

A few examples include:

Training Schedules

Often a training calendar is created and published to keep students on task and on target for completion dates, whether by topic or module. This may be in the form of a Gant chart, Excel spreadsheet, calendar, or an output from scheduling software. Again, anything that can be turned into a PDF can be displayed here for a custom program.

Lesson Plans

Often in a custom or blended training model, assignments go well beyond watching the videos within MindPro. In these situations instructors can put together lesson plans for their program and attach here. Most instructors have lesson plans that they currently use and are easy to implement. Below are two basic examples.

XYZ Company Logo

Custom Program Lesson Plan
Manufacturing Division of XYZ Corporation

Instructor: First / Last Name

General Instructions: Student notes should be maintained in a Topic & Module format that follows the curriculum. Microsoft Word and Excel are both good options with the preference going towards whichever the student is more familiar and comfortable with.

Not all Modules will have lesson plans, only those with specific instructions. Where no lesson plan exists follow the digital curriculum within MindPro.

Special Instructions: For group review sessions, please print the supporting media Summary Slides for curriculum specific questions as they mirror the videos one to one. This will allow the instructor to play / project the same video in the group review session to address your question as well as project the matching summary slide as a visual aide.

Where instruction is digital only with no planned group review, please post your questions on the discussion forum for the instructor to answer.

Topic: Breakthrough Vision

Module: Tool Selection

Objective: Identify the primary family of analytical tools used in Six Sigma work

Instructor Note: This will be a blended learning module instructed digitally via MindPro with a group review session following for Q&A's and to provide corporate specific examples.

Video Viewing Time: 25 minutes

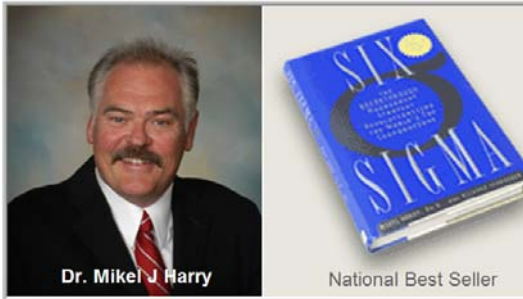

Completion Date: MM/DD/YY

Group Review: MM/DD/YY @ 1pm in Meeting Room 1A – 1 hour.

Total Video Run Time		4:32:12

General Communications

Maybe it's simply including an instructor biography or posting a welcome message to students that are remotely training with virtual instructor support. Or you could include a message from the CEO explaining what the overall goals and plans are for your training program and how it fits into the bigger picture for the company. The possibilities become limitless.

Dr. Harry has been widely recognized and cited in many publications as the principal architect of Six Sigma and the world's leading authority within this field. His ground breaking book entitled *Six Sigma: The Breakthrough Management Strategy Revolutionizing the World's Top Corporations* has been on the "best seller list" of the Wall Street Journal, Business Week, and Amazon.com. His companion book to this bestseller was entitled: *Six Sigma Fieldbook: How to Successfully Implement the Six Sigma Breakthrough Management Strategy*.
